by deleting all language after the enacting clause and by substituting instead the following:

SECTION 1. Tennessee Code Annotated, Title 69, Chapter 12, Part 1, is amended by adding the following appropriately designated new section:

Section 69-12-127.

(a)

(1) The department of environment and conservation shall provide to the executive officer of each local government in this state an inventory of the existing dams located within the jurisdiction of such local government.

(2) The executive officer of the local government shall be responsible for providing such inventory to the agency of such local government responsible for the issuance of building permits, if such local government requires the issuance of a building permit prior to the initiation of construction of a structure or facility or the alteration of an existing structure or facility.

(b)

(1) When application is made to a local government described in subsection (a), or the appropriate agency thereof, for a building permit to construct a structure or facility or to alter an existing structure or facility, the local government, or appropriate agency thereof, shall notify the applicant if the proposed structure

or facility or alteration of an existing structure or facility is located downstream of an existing dam.

(2) Prior to issuing a building permit to construct any proposed structure or facility or to alter any existing structure or facility located downstream from an existing dam, the local government, or appropriate agency thereof, shall inform the applicant of the following:

(A) That the proposed construction or alteration could potentially be affected by the failure of such dam and thus the hazard category of such dam may reclassified; and

(B) That the applicant may be liable for any improvements to such dam necessitated by the reclassification of the hazard category of such dam or the classification of such dam, if the dam has not previously been classified.

(3) The department shall determine whether the proposed construction or alteration will result in the reclassification of the hazard category of such dam or the classification of such dam, if the dam has not previously been classified. Using analysis methods acceptable to the commissioner, anyone building downstream of a dam such that the construction may raise the
